

Rider instructions for racing at the Bud Harris Track

1. The inside of the white line is out of bounds

Passing riders or racing to the left of the white line is not allowed. If you get pushed or need to avoid a crash, just slide back to your previous position when it is safe.

2. Do not overlap wheels

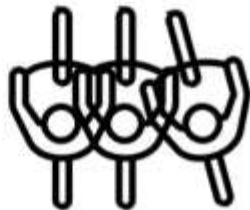

If the rider in front changes direction, a touch of wheels may quickly cause a crash

Half a wheel length gap is safer and still gives a good draft

3. Hold your line through the turns

4. Maintain a straight line during sprints
